

PRO GOLD ORGANIC-LOCK™ CINDER WARNING TRACK MIX

1. Pro Gold Warning Track Mix shall consist of Cinder Sand as produced by Gail Materials
2. Organic-LockI™ organic binder as distributed by Gail Materials shall be blended with a pug mill that includes a weight belt feeder that insures the proper ratio and the uniform blending of the binder. Bucket or Belt blending are not acceptable methods.
3. For installation of new tracks place Pro Gold Warning Track Mix to a minimum depth of 4 inches compacted.
4. Evenly spread the material over the entire surface area and apply water so that the entire depth of material is moist. Level to desired grade. Compact with a minimum 2000 lb. static drum roller. It should be noted that for a level surface it is recommended to grade the area with a laser level or similar.
5. Supplier – Gail Materials (951) 667-6106, www.gailmaterials.net
